Figure 1

Figure 1. The effect of the initial concentration of the monomer on the polymerization of α -methylstyrene initiated by BuLi in THF at -78°C . The polymerization was carried out in the presence of 0.01 mole-% of BuLi in THF at -78°C . The polymerization was carried out in the presence of 0.01 mole-% of BuLi in THF at -78°C . The polymerization was carried out in the presence of 0.01 mole-% of BuLi in THF at -78°C .
