FIGURE 1. The effect of the concentration of the inhibitor on the rate of polymerization of styrene in the presence of $\text{K}_2\text{S}_2\text{O}_8$ at 50°C . The concentration of $\text{K}_2\text{S}_2\text{O}_8$ was 1.0×10^{-2} mole/l. The concentration of the inhibitor was 0.001 mole/l. (O) $\text{K}_2\text{S}_2\text{O}_8$ alone; (●) $\text{K}_2\text{S}_2\text{O}_8$ + $\text{K}_2\text{S}_2\text{O}_8$; (▲) $\text{K}_2\text{S}_2\text{O}_8$ + $\text{K}_2\text{S}_2\text{O}_8$; (□) $\text{K}_2\text{S}_2\text{O}_8$ + $\text{K}_2\text{S}_2\text{O}_8$.
