

This architectural section drawing illustrates a building facade with a grid of windows. The ground level is indicated by a hatched area at the bottom. The facade features several window types: two small rectangular windows on the left, followed by two rows of larger windows. The top row consists of five windows, each with a yellow frame and a pink base. The bottom row consists of four windows, each with a yellow frame and a pink base. The windows are arranged in a symmetrical pattern, with a central vertical axis. The drawing uses a color palette of yellow, pink, and grey to distinguish different components of the facade.

This architectural section drawing illustrates the facade of a building, showing the arrangement of windows and structural components. The drawing is divided into four vertical sections by three vertical lines. The top section shows a row of windows with orange and red outlines. The middle section shows a row of windows with orange and red outlines, and a small orange rectangle above them. The bottom section shows a row of windows with orange and red outlines. The drawing uses various line styles (solid, dashed, dotted) and colors (orange, red, grey) to represent different materials and structural elements. A hatched area at the bottom represents the ground level.

This architectural section drawing illustrates a building with a gabled roof. The structure is divided into three main bays by vertical wall supports. The left and middle bays feature two levels of windows, while the right bay has a single level of windows. The ground floor includes several door openings, and the upper floor has a series of smaller, rectangular openings. The drawing uses various line styles and colors (red, yellow, black) to represent different structural components and materials.
